

# Project Case Study

## Woodman Point Wastewater Treatment Plant – Torque Tube, Column and Floc Skirts

End User            Water Corporation WA  
Client                Smith & Loveless New Zealand Ltd.  
Location            Perth, Western Australia  
Market Sector      Industrial

### Scope of Works:

Alltype Engineering was contracted by Smith & Loveless to undertake the fabrication of Torque Tubes, Columns, Suction Arms, Manifolds and EDI Well Halves.

All fabricated items used in the Woodman Point Wastewater Treatment Plant which was constructed by WP180.

A fairly complicated project which incorporated rolling, machining and surface treatment to tight tolerances.
