

CS04 Unit Control Panel Upgrade

End User	Australian Gas Infrastructure Group
Client	Australian Gas Infrastructure Group
Location	DBP Compressor Station 4 (near Carnarvon, WA)
Market Sector	Oil & Gas

Scope of Work:

Alltype Engineering was contracted to undertake the Electrical and Instrumentation hardware installation and upgrade works associated with the CS4 compressor station unit control panel (UCP) works at a remote location, inland of Carnarvon, Western Australia.

With remote travel and accommodation demands and working with the specialist OEM Solar Turbines for the gas turbine compressor package, Alltype Engineering completed the UCP upgrade works with zero safety incidents within a strict timeframe and operating conditions, ensuring continuity of gas supply to end users through this critical piece of gas transmission infrastructure.
